

Sprint 2 Review

Product Name: RIFFAGE

Team Name: RIFFAGE

Scrum Master: Ryan Reeves

Product Owner: Preston Fraser

Actions to stop doing:

In this sprint, we still have not stumbled across any (obvious) issues with our process. We consistently put in a good quantity of work both independently and in the group setting. We have maintained a good level of communication and we seem to be on the same page about what the final product should look and feel like. There are no immediate blemishes to how we conduct our work so we think that we should stick to our current process.

Actions to start doing:

- Keeping and updating a consistent burnup chart throughout the sprint.
- Commenting our code more thoroughly.
- Adhering to the design principles that we have agreed upon.
- Maintaining the scrum board to accurately reflect our progress.

Actions to keep doing:

We should continue to conduct group work sessions immediately following the SCRUM sessions that we hold since it allows us to deal with the impediments that we address just moments ago. We should also continue to regularly check Slack so no announcements pass us by.

Work completed:

1. As a user I want a way to manage my account settings
2. As a musician, I want a way to edit my riff entries so that I can build on their description later.
3. As a musician, I want a way to attach audio files to the riff entries so that I can hear what they sound like.
4. As a musician, I want a page to search my riff library so that I can find the riffs I want to use.

Work not completed:

1. As a user, I want a consistent interface so that I am not confused with every new page I visit.
2. As a user I want a way to reset my password so I don't lose access to my account.

Work completion rate:

- Total number of user stories completed: 4
- Total number of estimated ideal work hours completed: 22
- Total number of days: 14
- User stories per day: 0.2857
- Ideal work hours per day: 4
