

Working Prototype Known Problems Report

Product: RIFFAGE

Team: RIFFAGE

Date: December 3, 2017

Functional Issue	Caused By	Location of Fault	Possible Action for Removal
Reset Password does not work.	Functionality not implemented.	Login page	Implement the functionality.
Private Account setting does not make all riffs private.	Functionality not implemented.	Account Settings, Collection	Refactor the privacy settings such that account privacy takes precedence over riff privacy.
Collection columns do not search successfully together.	All columns use the same search function and it they interfere with one another's setting of the table rows' display attributes.	search() function in collection.html	Plan out the table's search logic more carefully such that the column searches are able to work in tandem.
No size limit on file uploads - for audio and documentation	Functionality not implemented	Collection/models.py	Research file size validations
Able to use Delete Selected with nothing selected.	No detection for number of selected rows = 0.	Inbox	Review the number of selected rows and if 0, induce pop-up saying to select rows.
Able to tag a riff with multiple of the same tag	Duplicate tag detection not implemented	Forms page	Implement duplicate tag detection.
