

Installation Guide/User Manual

1. Clone the project repo using Git:

```
git clone https://github.com/riffage/RIFFAGE
```

2. Install Python 3 (<https://www.python.org/downloads/>)

3. Create a virtual environment to use for Riffage:

```
python3 -m venv venv
```

4. Activate the virtual environment:

In Linux / macOS:

```
source venv/bin/activate
```

In Windows:

```
venv\Scripts\activate
```

5. Install Django and other required packages:

```
cd RIFFAGE
```

```
pip install -r requirements.txt
```

6. Reset the database for Riffage:

```
./manage.py migrate
```

7. Run RIFFAGE:

```
./manage.py runserver
```

8. View the running site at <http://localhost:8000>

Once on the site, go to the sign up tab and fill in the fields. Once you have an account, you will be able to create a new Riff in the Collections page, as well as view Riffs from other users that

have been made public. You can also view messages in your inbox, as well as change your information in the Settings.
